

List of Files

Google Drive

The majority of the documentation and submissions for the project can be found in the Google Drive linked below:

<https://drive.google.com/drive/u/1/folders/0ADiBxn-qXjG6Uk9PVA>

The file organisation in the Google Drive is represented by the following file tree:

The subdirectories in the drive represent the different categories of files stored, and are sorted alphabetically.

Design

The Design folder contains all the UI prototype designs, as well as the system architecture and database schema diagrams. It represents the documentation generated during the design phase of the project.

Display Day Video

This folder contains all the video files and slides created for the Display Day video submission. This includes both draft and final video versions, and replaces the Display Day poster.

Display Day Video

This folder contains the slides prepared for the Display Day Presentation sessions. The project will be presented to the supervisor and industry judges during these sessions.

Literature Review

All the files related to the Literature Review conducted at the start of the project are stored in this folder. This includes ideation regarding potential research topics, resource links, references, and summaries of useful papers read by both project partners. The project timeline created as a part of the Research Intent section is also included in this folder, along with the Literature Review and Statement of Research Intent Seminar slides.

Market Research

This folder contains the document generated as a part of the market research phase. This includes the key requirements identified for the main target market. This includes categorising the requirements based on whether it is applicable to renters or owners. Additionally, the key project stakeholders can also be found in this section of the compendium.

Mid-year Video

The final video submission and slides for the mid-year progress video can be found in this folder.

Plan

This section of the compendium includes the project plan created in mid-June to guide the project implementation and set deadlines for incremental milestones to be completed. The shared components required for the frontend implementation, and the ideation process for the application colour scheme is also documented here.

User Testing

This folder contains the requirements and testing protocol produced as a part of the user testing process. The user testing feedback form, responses and video recording can also be found here.

Individual Files

Literature Review and Statement of Research Intent (LRSRI)

Individual submission found in folder "LRSRI".

Final Report

Individual submission found in folder "Final Report".

Codebase

The codebase for the project is hosted on GitHub, and can be accessed using the following link:

<https://github.com/AirParks/AirPark>

The instructions for setting up the project are located in the README.md file located in the root directory of the repository.
