Option 1 Implemented

Instructions

Java Version 8

java version "1.8.0_261"
Java(TM) SE Runtime Environment (build 1.8.0_261-b12)
Java HotSpot(TM) 64-Bit Server VM (build 25.261-b12, mixed mode)

Running the Application

Open the folder containing `client.jar`, `cache.jar`, and `server.jar` in the file explorer.

Double-click `startAll.bat`

Managing Files

The file system is single layered inside the `storage` folder.

Any files with text can be added, modified, and deleted as the applications are running.

To retrieve any changes in existing files, the refresh button on the client screen can be clicked.
